## Parent Information

These times tables problems include a mix of **memorisation** questions and more challenging **mental computation** questions.

It is perfectly acceptable for students initially earning their times tables to focus on the memorisation questions (e.g.  $2 \times 3$ ,  $8 \times 2$ ,  $6 \times 8$ ,  $8 \times 2$ ) and skip the mental computation questions.

As students gain more practice, they can attempt the mental computation questions.

These can be solved by different strategies, such as the split strategy.

**Example 1:**  $26 \times 2 =$

26 groups of 2 = 25 groups of 2 plus 1 group of 2  
 $(25 \times 2) + (1 \times 2) = 50 + 2 = 52$

**Example 2:**  $27 \times 2 =$

27 groups of 2 = 20 groups of 2 plus 7 groups of 2  
 $(20 \times 2) + (7 \times 2) = 40 + 14 = 54$

**Example 3:**  $29 \times 2 =$

29 groups of 2 = 30 groups of 2 minus 1 group of 2  
 $(29 \times 2) = (30 \times 2) - (1 \times 2) = 60 - 2 = 58$

**Example 3:**  $34 \div 2$

34 shared into two groups = 30 shared into 2 groups plus 4 shared into 2 groups  
 $(30 \div 2) + (4 \div 2) = 15 + 2 = 17$

Another method:  $15 \times 2 = 30$ ,  $16 \times 2$  is 32,  $17 \times 2 = 34$
